

FOR IMMEDIATE RELEASE

Test Coach Corporation launches newest member of FINN[®] family – Ultra FINN[™] – smaller, faster, more accurate.

CHICAGO, IL, September 1, 2006 - - Test Coach Corporation, leading test programming firm and the developer of a full line of LED color and intensity testing tools, marketed under the FINN[®] brand, has just launched their newest product, the Ultra FINN[™]. This product is designed to meet and exceed the latest test requirements for the LEDs used in manufacturing today. The Ultra FINN[™] package is more than eight times smaller than its predecessor, making it possible to test very closely spaced LEDs on a printed circuit board. In addition, the Ultra FINN[™] can test most LEDs in less than 10 milliseconds while providing even greater accuracy of measurement for both color and intensity.

“We are very excited about the Ultra FINN[™] and its remarkable capabilities which will allow our customers to reach the next level of LED testing,” stated Isabelle Schmitt, President of Test Coach. “With the new, smaller package installation will be even easier thereby reducing the cost of implementation.”

When asked about the motivation for developing this LED sensor, Test Coach Vice President and Ultra FINN[™] designer, Kevin Schmitt, said “We realized that we could improve upon the performance of the existing LED test solutions on the market, including our own. Fiber optics and light pipes are no longer needed for tightly spaced LEDs. We needed a smaller package and now we have one – it is fast and very accurate.”

About Test Coach Corporation

Test Coach Corporation has developed a full line of LED color verification products marketed internationally under the FINN[®] brand. All FINN[®] products are protected under U.S. patent numbers 6,490,037 and 7,023,554. International patents pending. In addition to their family of products, Test Coach also offers comprehensive test services including: complete turnkey in-circuit test solutions for the Agilent 3070, GÖPEL boundary scan, and SPEA 4040 flying probe. More information on the company may be found at www.testcoachcorp.com.
